Full-stack Web Developer

Remote
May 2022 – Present

[Pokedex](#) — Developed a search option where users can search for different types of pokemon in a list and can see a brief description of it. At the same time, it will change the background of the pokemon depending on the type.

- Built with JavaScript | HTML | CSS | webpack | API's

[Math-magicians](#) — Created a web app that shows a calculator, which can do basic mathematical operations. Designed two more different routes where the user can change, to see different kinds of quotes and a home page.

- Built with: React | JavaScript | CSS | HTML | API's

[Bike Rentals](#) — Developed a webapp where the user can log in/sign up on the page. After successfully logging in to the page they can now see a list of bikes they can rent adding the start date, end date, location, and a specific motorcycle, this can be done by clicking the bike itself or by going to the reservations page itself where they can choose them by names.

- Built with: Ruby | Ruby on Rails | Rspec | React | JavaScript | CSS | APIs | Gems
